1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with C. McCarthy on 11/10/2005.

2. The application has been amended as follows: The following claims are amended.

1. A method for establishing a one-to-one voice communication in a communications system having different control plane and user-plane logical entities, comprising the steps of

starting a one-to-one call by call setup signaling embedded in a user-plane traffic sent from a calling subscriber to one of said user-plane logical entities, said embedded signaling identifying a called subscriber,

establishing, in response to said embedded call setup signaling, a logical call path between the ones of said user-plane logical entities which are to be involved in routing of the call related user-plane traffic,

assigning a call identifier to said call, and

forwarding any subsequent user-plane traffic relating said call and containing said call identifier over said call path from said calling subscriber to said called subscriber.

Art Unit: 2664

42. A user terminal for a communications system, said user terminal comprising a one-to-one call setup mechanism sending a user-plane leader packet to one of a plurality of a user-specific logical user-plane network entity entities in order to start a one-to-one voice call by call setup signaling embedded in user-plane traffic sent from a calling user to a called user, said leader packet containing an identifier of a the calling user and a the called user,

means for starting to send user-plane voice packets to said one of said plurality of logical user-plane network entity entities in response to receiving a user-plane call setup acknowledgement packet containing a call identifier assigned to a call, whereby said user plane voice packets containing said call identifier are forwarded over a logical call path established by ones of said plurality of logical user plane network entities for said call from said calling user to said called user in response to said embedded call setup signaling.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to AJIT G. PATEL whose telephone number is 571-272-3140. The examiner can normally be reached on MONDAY-THURSDAY.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Wellington Chin can be reached on 571-272-3134. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
